

Sudanese Baobab fruit pulp

التبليدي (القنقليز)

Adansonia digitata

Dried fruit pulp, clean

***Adansonia digitata* L.**

Botanical source

Dries on the tree

Drying

Pulp, powder, whole fruit

Forms

1 Scope

This sheet specifies baobab dried fruit pulp exported by Asmagh Sudanese Exports from Port Sudan. It does not apply to other products made from the fruit.

2 Synonyms

Baobab fruit pulp

Gongolez (قنقليز)

Tabaldi (تبليدي)

Adansonia digitata L.

3 Definition

The dried pulp of the fruit of the baobab tree, *Adansonia digitata* L., family Malvaceae (formerly Bombacaceae), separated from the shell and seeds.

4 Description

The fruit is a capsule with a hard shell covered in fine greenish-yellow to brownish hairs, and must be cracked open to reach the pulp. Inside, the pulp dries naturally on the tree into white to ivory, powdery chunks around dark brown, kidney-shaped seeds, held in segments by reddish fibres.

5 Grade and forms

Clean Pulp separated from the shell and seeds

Available as **Pulp** **Pulp powder** **Whole fruit**

6 Uses

The pulp is rich in fibre and vitamin C and is used more and more as an ingredient in health foods.

Juices and drinks

Health foods

Traditional drinks

7 Requirements

7.1 General requirements

- ✓ Characteristic tart taste, from its natural citric, malic, succinic and tartaric acids
- ✓ Free from abnormal odour and colour
- ✓ Free from toxigenic moulds, *Escherichia coli* and *Salmonella*
- ✓ Free from lumps and mould
- ✓ Free from live or dead insects, their fragments and remains, and from insect and rodent infestation
- ✓ Free from fertilisers and harmful chemicals

7.2 Technical requirements

	Moisture ≤ 8.7 % Total ash ≤ 9 % Acid-insoluble ash ≤ 1.0 % Impurities ≤ 3 % Extraneous matter ≤ 1 %	Protein ≥ 3.0 % Carbohydrates ≥ 70 % Dietary fibre, soluble and insoluble ≥ 40 % Vitamin C ≥ 280 mg/100 g Calcium ≥ 250 mg/100 g
---	--	--

Percent by mass. Vitamin C varies with the harvest and falls during storage; results are reported per lot.

7.3 Microbiological limits

Aerobic bacteria	≤10 ⁵ cfu/g	Yeasts and moulds	≤10 ⁴ cfu/g
<i>Escherichia coli</i>	Absent	<i>Salmonella</i>	Absent

7.4 Contaminants

Heavy metals	Within the limits of the FAO/WHO Codex General Standard for Contaminants and Toxins in Food and Feed (CXS 193-1995)
Pesticide residues	Within Codex maximum residue limits and those of the importing country
Radioactivity	Within the FAO/WHO guideline levels for radionuclides in food

7.5 For buyers in the European Union

Baobab dried fruit pulp is an authorised novel food in the EU (Commission Decision 2008/575/EC, now in the Union list). Its specification sets:

Foreign matter	≤ 0.2 %
Moisture (loss on drying)	11.1 – 12.0 g/100 g
Ash	5.5 – 6.6 g/100 g
Typical protein	2.03 – 3.24 g/100 g
Typical carbohydrate	78.3 – 78.9 g/100 g, of which sugars 16.9 – 25.3
Label name	“Baobab fruit pulp”

Some of these values differ from our limits above. Ask us for lot results against the EU specification before contracting for the EU market.

8 Packaging

Packed in approved packages that are clean, dry and well sealed, keep the pulp's properties, and neither affect the product nor are affected by it. Asmagh ships in bags of 25 or 50 kg.

Container load about 11 MT per 20 ft container.

9 Storage

Stored in a clean, dry place, low in humidity and heat, and protected from light and dust.

10 Labelling

In addition to Sudanese Standard SDS 2889/2011 (labelling of packaged food), every package shows:

Product name  Baobab dried fruit pulp	Production and expiry date  Month and year	Code  Lot code	Country of origin  Sudan
Place of processing  Sudan	Net weight (kg)  25 or 50 kg	Producer, packer or distributor  Name and address, or brand	Writing  Clear and permanent

11 Shelf life

No more than one year from the date of production.

12 Sampling and testing

Samples are taken according to Gulf Standard GSO 1287 (sampling of packed fruit and vegetable products). Tests follow AOAC methods in a laboratory accredited by the Sudanese Standards & Metrology Organization (SSMO).

Each shipment carries an SSMO analysis and quality certificate.

From field to port

من الحقل إلى الميناء

Every lot is sampled on arrival, cracked, separated, sorted and tested before it is packed. Storage and loading are checked too, because quality can be lost after processing.

1 Our quality process

1

Sourcing

Ripe fruits bought from collectors after they have dried on the tree; every lot is checked.

2

Cracking

Shells cracked open and the pulp separated from the shell, seeds and fibres.

3

Sorting

Pulp sorted to remove dark, mouldy and foreign pieces.

4

Milling

Milled and sieved into powder when the buyer orders powder.

5

Testing

Samples tested for moisture, ash, vitamin C and microbiology.

6

Packing

Packed in clean, sealed 25 or 50 kg bags marked with product, lot and weight.

7

Storage

Kept dry, cool and out of the light until loading.

8

Loading and shipping

Containers inspected and loading supervised; shipped from Port Sudan with full documents.

2 Origin and shipping

The baobab fruit, known in Sudan as gongolez, dries naturally inside its hard shell on the tree. The cleaned pulp travels to Port Sudan on the Red Sea for export.

Forms	Pulp, pulp powder or whole fruit
Port of loading	Port Sudan (SDPZU), Red Sea
Container load	About 11 MT per 20 ft container
Ready to load	Usually 10–15 days after contract
Transit	About 2–8 weeks, by destination
Delivery terms	FOB Port Sudan, CFR or CIF
Payment terms	Irrevocable L/C at sight, TT advance, or D/P
Samples	Free; courier paid by the buyer

3 Export documents

Certificates travel with each shipment and are exchanged through the banks or directly with the buyer, so the goods clear customs at destination.

Product certificates

- 

Certificate of origin
Sudan Chamber of Commerce; general or preferential forms.
- 

Phytosanitary certificate
Official inspection against the importing country's pest list.
- 

Analysis and quality certificate
Issued by the Sudanese Standards & Metrology Organization (SSMO).
- 

Fumigation certificate
Treatment, chemical, dose and temperature used.
- 

Inspection certificate
Optional; by an international inspection company chosen by the buyer.

Shipping documents

- 

Export contract
Attested by the Ministry of Trade and the Chamber of Commerce.
- 

Commercial invoice
Goods, quantity, value and terms.
- 

Packing list
Every bag in each container, with counts and weights.
- 

Bill of lading
Issued by the shipping line on loading.
