

Sudanese Millet grains

الدخن

Pennisetum glaucum

Pearl millet, whole or hulled

Pennisetum glaucum

Botanical source

Kordofan and Darfur

Origin

1008.29

HS code (indicative)

1 Scope

This sheet covers whole and hulled pearl millet grains for human consumption, exported by Asmagh Sudanese Exports from Port Sudan. It follows the Codex standard for whole and decorticated pearl millet grains (CXS 169-1989).

2 Synonyms

Pearl millet

Dukhn (دخن)

Pennisetum glaucum (L.) R. Br.

syn. *Pennisetum americanum*, *Cenchrus americanus*

3 Definitions

Whole grains

Millet grains as obtained by threshing, with no other mechanical treatment.

Hulled (decorticated) grains

Millet grains from which the outer parts, 20–22 % of the weight of the whole grain, have been removed mechanically, for example by simple abrasion.

4 Description

Small, rounded grains grown on the sandy soils of Kordofan and Darfur. Pearl millet is a nutritious, naturally gluten-free ancient grain and a staple food for many people around the world.

5 Grade and forms

Clean	Machine-cleaned whole grains
-------	------------------------------

Available as

Whole grains

Whole flour

Hulled flour

6 Uses

Flour and porridge (aseeda)

Gluten-free foods

Bird and animal feed

7 Requirements

7.1 General requirements

- ✓ Of one colour: brown, white or green
- ✓ Free from live and dead insects, their parts and life stages, and from visible mould
- ✓ Free from foreign odour and taste
- ✓ Sound and clean; free from dust, organic impurities such as bird or rodent droppings and insects, and metal pieces

7.2 Technical requirements

Requirement	Whole grains	Hulled grains
Moisture, max	13 %	13 %
Protein, min	10 %	8 %
Crude fibre	3.0 – 4.5 %	≤ 2.0 %
Fat	3.5 – 6.0 %	2.0 – 4.0 %
Total ash	–	0.8 – 1.0 %
Extraneous matter, max	2.0 %	0.5 %
Weight of 1 000 grains	5.0 – 10.0 g	4.0 – 8.0 g
Degree of hulling, max	–	22 % of grain weight

Percent by mass; protein, fibre, fat and ash on a dry matter basis. Test methods: moisture SDS 487/2010, ash SDS 1015/2008, protein SDS 1016/2002, fibre SDS 3340/2002, fat SDS 1805/2002. The weight of 1 000 grains follows the Codex annex; the other values follow the Sudanese specification. Codex expresses protein as nitrogen × 5.7.

7.3 Contaminants

Lead ≤ 0.2 mg/kg AOAC 999.11	Cadmium ≤ 0.1 mg/kg AOAC 999.11	Radioactivity ≤ 10 Bq/kg	Pesticide residues Codex MRLs and importing country
Mycotoxins			
Within Sudanese Standard SDS 2842/2006 (mycotoxins in grains and their products)			
Microbiology			
Within Sudanese Standard SDS 2013/2007 (microbiological limits for cereals)			

8 Packaging

Packed in sound, durable and clean packages that do not contaminate the grain or change its properties; sacks are strongly sewn or sealed. Asmagh ships in polypropylene bags of 50 kg.

Container load about 22 MT per 20 ft container.

9 Storage

Stored in clean, well-ventilated places, away from pollution and humidity, never used before for toxic substances, pesticides, herbicides or strong-smelling materials, and protected from insects and rodents, in line with Sudanese Standard SDS 3891/2007 (food storage).

10 Labelling

In addition to Sudanese Standard SDS 2889/2011 (labelling of packaged food), the packages or accompanying documents show:

Product name and type  Millet grains, whole or hulled	Country of origin  Sudan	Production or harvest date  Month and year	Net weight (kg)  50 kg
Producer  Name, address and trade mark	Lot identification  On every bag	Validity period  18 months whole; 3 months hulled	Bulk shipments  Details in the shipping documents

11 Transport

- Transported in good conditions that protect the grain from weather changes, insects, rodents, contamination and damage.
- Vehicles and containers are sound and clean, and have not been used before to carry pesticides, herbicides or anything else that could affect the product.

12 Shelf life

Whole millet grains: 18 months. Hulled millet: 3 months.

13 Sampling and testing

Samples are taken according to Sudanese Standard SDS 1005/2007 (sampling of grains) and tested by the methods in section 7.2. For the weight of 1 000 grains, 250 grains are counted at random, weighed, and the weight multiplied by 4.

Each shipment carries an SSMO analysis and quality certificate.

From field to port

من الحقل إلى الميناء

Every lot is sampled on arrival, machine-cleaned, sorted and tested before it is packed. Storage and loading are checked too, because quality can be lost after processing.

1 Our quality process

1

Sourcing

Bought from growers and traders in Kordofan and Darfur; every incoming lot is checked.

2

Cleaning

Machine-cleaned to remove dust, chaff, stones and foreign matter.

3

Sorting

Grains of other colours and damaged grains removed for an even lot.

4

Hulling and milling

Hulled or milled into flour when the buyer orders it.

5

Testing

Samples tested for moisture, extraneous matter and composition.

6

Packing

Packed in 50 kg polypropylene bags marked with product, lot and weight.

7

Storage

Kept clean, dry and ventilated, protected from insects and rodents.

8

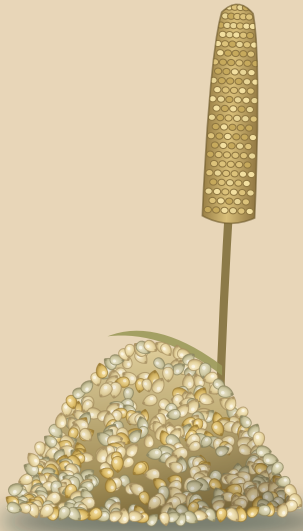

Loading and shipping

Containers inspected and loading supervised; shipped from Port Sudan with full documents.

2 Origin and shipping

Pearl millet (dukhn) is grown on the sandy soils of Kordofan and Darfur. The cleaned grain travels to Port Sudan on the Red Sea for export.

HS code	1008.29 (indicative; confirm with your customs broker)
Port of loading	Port Sudan (SDPZU), Red Sea
Container load	About 22 MT per 20 ft container
Ready to load	Usually 10–15 days after contract
Transit	About 2–8 weeks, by destination
Delivery terms	FOB Port Sudan, CFR or CIF
Payment terms	Irrevocable L/C at sight, TT advance, or D/P
Samples	Free; courier paid by the buyer

3 Export documents

Certificates travel with each shipment and are exchanged through the banks or directly with the buyer, so the goods clear customs at destination.

Product certificates

Certificate of origin
Sudan Chamber of Commerce; general or preferential forms.

Phytosanitary certificate
Official inspection against the importing country's pest list.

Analysis and quality certificate
Issued by the Sudanese Standards & Metrology Organization (SSMO).

Fumigation certificate
Treatment, chemical, dose and temperature used.

Inspection certificate
Optional; by an international inspection company chosen by the buyer.

Shipping documents

Export contract
Attested by the Ministry of Trade and the Chamber of Commerce.

Commercial invoice
Goods, quantity, value and terms.

Packing list
Every bag in each container, with counts and weights.

Bill of lading
Issued by the shipping line on loading.
