

Sudanese Peanuts

الفول السوداني

Arachis hypogaea

Kernels by count, and in-shell

Arachis hypogaea L.

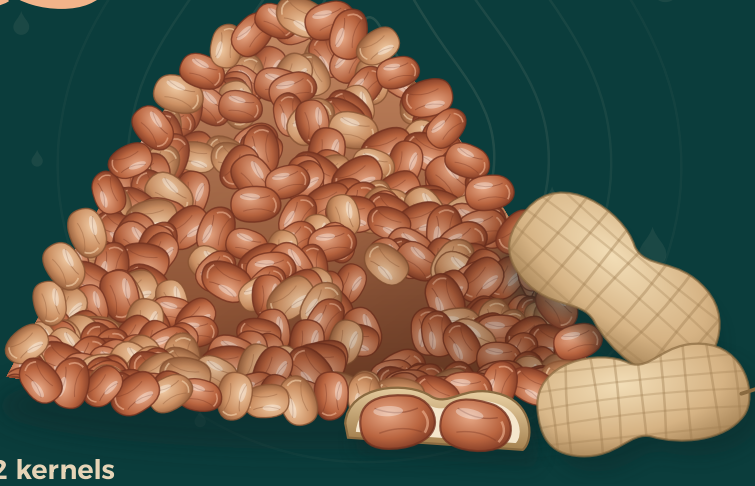

Botanical source

Ashford, Barberton

Varieties

1202.42 kernels

HS code (indicative)

1 Scope

This sheet specifies Sudanese peanuts for human consumption, as kernels or in the shell, exported by Asmagh Sudanese Exports from Port Sudan.

2 Synonyms

Peanuts

Groundnuts

Ful Sudani

Arachis hypogaea L.

3 Definition

The seeds of the peanut plant, *Arachis hypogaea* L. (family Fabaceae), taken from Sudanese peanuts, cleaned and dried, and free from foreign taste or odour.

4 Description

Sudan is one of Africa's largest peanut producers. Our kernels are sorted by count and tested for aflatoxin to meet the limits of the destination market.

5 Grades we supply

 Kernels 50/60 Ashford Large kernels.	 Kernels 70/80 Barberton Spanish-type kernels.	 Kernels 80/90 Small Small kernels.	 In-shell 9/11 Whole pods Cleaned pods in the shell.
--	--	---	--

Available as

Kernels

In-shell

6 Size by count

Kernel size is traded as a count: the number of kernels per ounce (28.35 g).

Count per ounce	Kernels per 100 g	Variety type
40/50	141 – 176	Ashford
50/60	176 – 212	Ashford
60/70	212 – 247	Ashford
70/80	247 – 282	Barberton (Spanish)
80/90	282 – 317	Small kernels

7 Uses

 Roasted snacks	 Peanut butter	 Confectionery	 Oil crushing
---	--	--	---

8 Requirements

8.1 Health requirements

- ✓ Cleaned, dried and free from foreign taste or odour
- ✓ Pesticide and herbicide residues within Codex maximum residue limits and those of the importing country
- ✓ Heavy metals within the Codex General Standard for Contaminants and Toxins in Food and Feed (CXS 193-1995)
- ✓ Health requirements kept throughout packing and transport

8.2 Measuring requirements

	Oil ≥ 47 % Protein ≥ 22 % Moisture ≤ 6 %	Crude fibre ≤ 3 % Free fatty acids, as oleic acid ≤ 3 % of the extracted oil Decorticated nuts ≤ 3 %
---	--	--

Percent by mass. Oil, protein and fibre apply to kernels.

8.3 Aflatoxin limits by market

Every lot is tested for aflatoxin against the limit of its destination. For reference:

Codex (CXS 193-1995)	Total aflatoxins ≤ 15 µg/kg in peanuts intended for further processing
European Union (Reg. 2023/915)	Aflatoxin B1 ≤ 2-8 µg/kg and total ≤ 4-15 µg/kg: the lower limits for peanuts eaten directly, the higher for peanut stored or processed before use
China (GB 2761)	Aflatoxin B1 ≤ 20 µg/kg in peanuts and peanut products

9 Packaging and storage

Packed in bags that let the peanuts breathe, such as jute or woven polypropylene, that are dry, clean and free from foreign objects, dirt, moisture and odours. Stored in well-ventilated areas away from contaminants. Asmagh ships in jute or polypropylene bags of 25 or 50 kg.

Container load about 18 MT of kernels per 20 ft container.

10 Sampling

Samples for testing are taken, packed and stored as set by the Sudanese standard specifications.

11 Labelling

Every package carries a clear label that resists damage, showing:

Product name  Sudanese peanuts	Product type and count  e.g. kernels 50/60	Production and expiry date  Month and year	Code  Lot code
Country of origin  Sudan	Place of processing  Sudan	Producing company  Asmagh Sudanese Exports	Net weight (kg)  25 or 50 kg

12 Testing

Each shipment carries an analysis and quality certificate issued by the Sudanese Standards & Metrology Organization (SSMO).

13 Inspection

Buyers may appoint an international inspection company to sample and check quality and quantity at loading.

From field to port

من الحقل إلى الميناء

Every lot is sampled on arrival, cleaned, shelled, sorted by count and tested before it is packed. Storage and loading are checked too, because quality can be lost after processing.

1 Our quality process

1

Sourcing

Bought from trusted growers and traders; every incoming lot is checked.

2

Cleaning

Cleaned to remove dust, stones and foreign matter.

3

Shelling

Decorticated into kernels for kernel orders.

4

Sorting by count

Kernels sorted by size into count grades such as 50/60 and 70/80.

5

Aflatoxin testing

Every lot tested for aflatoxin against the destination's limit.

6

Packing

Packed in clean 25 or 50 kg bags marked with product, count, lot and weight.

7

Storage

Kept dry, cool and well ventilated, away from contamination until loading.

8

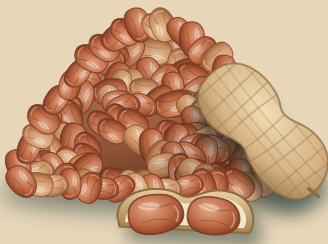

Loading and shipping

Containers inspected and loading supervised; shipped from Port Sudan with full documents.

2 Origin and shipping

Sudan is one of Africa's largest peanut producers. Peanuts are shelled, sorted by count and tested for aflatoxin, then travel to Port Sudan on the Red Sea for export.

HS code	1202.42 kernels; 1202.41 in-shell (indicative; confirm with your customs broker)
Port of loading	Port Sudan (SDPZU), Red Sea
Container load	About 18 MT of kernels per 20 ft container
Ready to load	Usually 10–15 days after contract
Transit	About 2–8 weeks, by destination
Delivery terms	FOB Port Sudan, CFR or CIF
Payment terms	Irrevocable L/C at sight, TT advance, or D/P
Samples	Free; courier paid by the buyer

3 Export documents

Certificates travel with each shipment and are exchanged through the banks or directly with the buyer, so the goods clear customs at destination.

Product certificates

Certificate of origin
Sudan Chamber of Commerce; general or preferential forms.

Phytosanitary certificate
Official inspection against the importing country's pest list.

Analysis and quality certificate
Issued by the Sudanese Standards & Metrology Organization (SSMO).

Fumigation certificate
Treatment, chemical, dose and temperature used.

Inspection certificate
Optional; by an international inspection company chosen by the buyer.

Shipping documents

Export contract
Attested by the Ministry of Trade and the Chamber of Commerce.

Commercial invoice
Goods, quantity, value and terms.

Packing list
Every bag in each container, with counts and weights.

Bill of lading
Issued by the shipping line on loading.
