العدسية السودانية

Cajanus cajan

Whole, cleaned, new crop

Cajanus cajan
Botanical source

New crop, whole
Crop

0713.60
HS code (indicative)

1 Scope

This sheet specifies pigeon pea seed for human consumption, exported by Asmagh Sudanese Exports from Port Sudan. It does not cover processed or broken seeds, seeds for animal feed, or seeds prepared to a special standard.

2 Synonyms

Pigeon pea
Adasiya (Sudan)
Toor, tur
Cajanus cajan

3 Definition

The dry seeds of *Cajanus cajan* (family Fabaceae). Like other pulses, they are seeds of leguminous plants distinguished from leguminous oilseeds by their low fat content.

4 Description

A drought-tolerant pulse grown in the rain-fed areas of Sudan and an important source of plant protein. We supply it whole, machine-cleaned, from the new crop.

5 Size classes

Large seeds
> 12 g
Weight of 100 seeds.

Medium seeds
10 – 12 g
Weight of 100 seeds.

Small seeds
< 10 g
Weight of 100 seeds.

Grade Clean: whole, new crop, machine-cleaned

6 Uses

Dal and split peas

Canned and cooked pulses

Flour

7 Requirements

7.1 General requirements

- ✓ Clean and free from foreign odour

✓ Fully mature

✓ Not germinated
- ✓ Even in colour and size, with a natural texture

✓ Free from insects at every stage, rodents and their filth

✓ Not genetically modified

7.2 Technical requirements

Moisture
≤ 10 %
method SDS 487/2010

Protein
≥ 20 %
method SDS 1016/2010

Hydration coefficient
≥ 100 %
method SDS 3629/2006

Foreign matter and impurities
≤ 3.0 %
method SDS 4872/2010

Broken seeds
≤ 1.0 %
method SDS 4897/2011

Damaged seeds
≤ 5.0 %
method SDS 7970/2000

Percent by mass, except hydration coefficient. Foreign matter and impurities, broken seeds and damaged seeds together shall not exceed 7 %.

7.3 Contaminants

Lead
≤ 0.2 mg/kg
AOAC method

Cadmium
≤ 0.1 mg/kg
AOAC method

Mycotoxins
≤ 15 µg/kg
method SDS 2843/2006

Radioactivity
≤ 10 Bq/kg

Pesticide residues shall not exceed the maximum residue limits set by the Codex Alimentarius.

8 Packaging

Packed in sound, strong and clean packages that do not contaminate the seed or change its odour or taste. Asmagh ships in polypropylene bags of 50 kg.

Container load about 22 MT per 20 ft container.

9 Storage

Stored in clean premises free from materials that may be hazardous to health, and suited to keeping the product's quality, in line with Sudanese Standard SDS 3891/2007.

10 Labelling

In addition to SDS 2889/2007 (labelling of packaged food), the packages and shipping documents show the following. For bulk shipments, the information is given in the shipping documents only.

Product name  Pigeon pea	Size class  Large, medium or small	Harvest season  Season and year	Lot number  Lot code
Country of origin  Sudan	Net weight  In tonnes or bag units	Exporter  Asmagh Sudanese Exports, Khartoum	Bulk shipments  Details in the shipping documents

11 Transport

- Transported in good conditions that protect the seed from weather changes, insects, rodents, contamination and damage.
- Vehicles and containers are clean and free from any trace of pesticides, herbicides, pungent or toxic materials.

12 Shelf life

Two years from the date of harvest.

13 Sampling and testing

Samples are drawn according to Sudanese Standard SDS 1005/2007. Tests use the methods listed in section 7.2.

For the weight of 100 seeds, a 200 g sample is drawn; 100 seeds are counted by hand or machine and weighed in grams.

Each shipment carries an analysis and quality certificate issued by SSMO.

asmagh.com

Values are specification limits. Results for each shipment are reported on its SSMO analysis and quality certificate.

Sheet 1 of 2

From field to port

من الحقل إلى الميناء

Every lot is sampled on arrival, cleaned, sized, sorted and tested before it is packed. Storage and loading are checked too, because quality can be lost after processing.

1 Our quality process

1

Sourcing

Bought from trusted growers and traders in Sudan's rain-fed areas; every incoming lot is checked.

2

Cleaning

Machine-cleaned to remove dust, stones and foreign matter.

3

Sizing

Graded by size, measured as the weight of 100 seeds.

4

Sorting

Broken, damaged and off-colour seeds removed.

5

Testing

Samples tested for moisture, impurities and the parameters in the buyer's specification.

6

Packing

Packed in 50 kg polypropylene bags marked with product, size class, lot and weight.

7

Storage

Kept dry and ventilated, off the floor and away from contamination until loading.

8

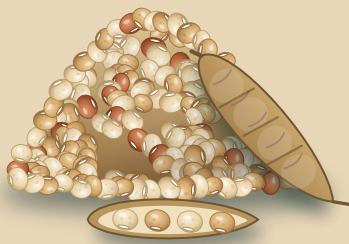

Loading and shipping

Containers inspected and loading supervised; shipped from Port Sudan with full documents.

2 Origin and shipping

Pigeon pea is a drought-tolerant pulse grown in the rain-fed areas of Sudan. The cleaned seed travels to Port Sudan on the Red Sea for export.

HS code	0713.60 (indicative; confirm with your customs broker)
Port of loading	Port Sudan (SDPZU), Red Sea
Container load	About 22 MT per 20 ft container
Ready to load	Usually 10–15 days after contract
Transit	About 2–8 weeks, by destination
Delivery terms	FOB Port Sudan, CFR or CIF
Payment terms	Irrevocable L/C at sight, TT advance, or D/P
Samples	Free; courier paid by the buyer

3 Export documents

Certificates travel with each shipment and are exchanged through the banks or directly with the buyer, so the goods clear customs at destination.

Product certificates

- 

Certificate of origin
Sudan Chamber of Commerce; general or preferential forms.
- 

Phytosanitary certificate
Official inspection against the importing country's pest list.
- 

Analysis and quality certificate
Issued by the Sudanese Standards & Metrology Organization (SSMO).
- 

Fumigation certificate
Treatment, chemical, dose and temperature used.
- 

Inspection certificate
Optional; by an international inspection company chosen by the buyer.

Shipping documents

- 

Export contract
Attested by the Ministry of Trade and the Chamber of Commerce.
- 

Commercial invoice
Goods, quantity, value and terms.
- 

Packing list
Every bag in each container, with counts and weights.
- 

Bill of lading
Issued by the shipping line on loading.
