

Sudanese Sesame

السمسم السوداني

Sesamum indicum

White, mixed and red; natural or hulled

Sesamum indicum L.

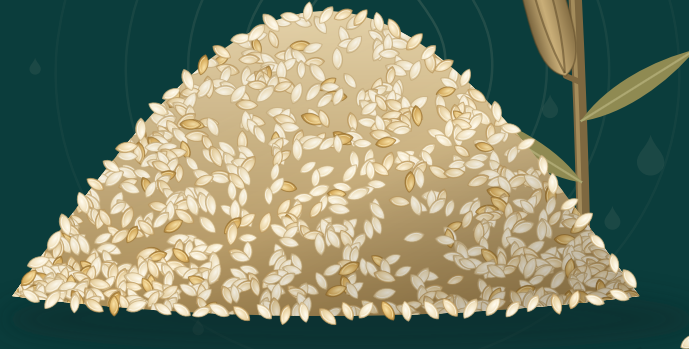

Botanical source

Gedaref, Sennar, Kordofan

Origin

1207.40

HS code (indicative)

1 Scope

This sheet specifies the conditions and characteristics of sesame seeds exported by Asmagh Sudanese Exports from Port Sudan.

2 Synonyms

Sesame

Simsim

Gingelly

Sesamum indicum L.

3 Definition

Sesame seeds are the seeds of *Sesamum indicum* L. (family Pedaliaceae). They are classified by colour into white, mixed and red sesame (section 5). Coloured seeds are sesame seeds whose colour differs from that of the type being graded.

4 Description

Small, flat, pear-shaped seeds grown mainly on the rain-fed plains of Gedaref, Sennar and Kordofan. Sudanese sesame is known for its high oil content and clean taste.

5 Types by colour

White sesame

≤ 5 % coloured seeds

Seed coats white to yellowish-white. Sudanese white sesame is often traded as Gedarif.

Mixed sesame

≤ 25 % coloured seeds

White sesame with more coloured seeds than the white type allows.

Red sesame

≥ 26 % coloured seeds

Red or brown sesame: white seed containing 26 % or more coloured seeds.

Available as

Natural, cleaned

Hulled

6 Uses

Oil crushing

Tahini and halva

Bakery toppings

Snacks and confectionery

7 Requirements

7.1 Health conditions

✓ Free from foreign odours and off-odours

✓ Pesticide and fertiliser residues within Codex maximum residue limits and those of the importing country

✓ Free from live or dead insects, insect parts and rodent remains

✓ Mycotoxins and heavy metals within the Codex General Standard for Contaminants and Toxins in Food and Feed (CXS 193-1995) and the importing country's limits

7.2 Standard specifications

Oil
≥ 54.0 %

Protein
≥ 19 %

Moisture
≤ 6.0 %

Free fatty acids, as oleic acid
≤ 3.0 %
of the extracted oil

Impurities
≤ 2.0 %

Crude fibre
≤ 7.0 %

Total ash
5.0 – 7.0 %

Calcium
1.0 – 1.3 %

Potassium
≥ 0.5 %

Phosphorus
0.5 – 0.7 %

Weight of 1 000 seeds
1.9 – 4.2 g

Percent by mass, except seed weight. Limits follow Sudanese Standard SDS 116/2002 and Syrian Standard 908/1991 for sesame seeds, and apply to natural (unhulled) seed. Most of the calcium is in the hull, so hulled sesame is supplied to the buyer's specification.

8 Packaging and storage

Packed in bags that let the seeds breathe, such as jute or woven polypropylene, that are clean, dry and strong and free from foreign odours. Stored away from direct sunlight, humidity and sources of pollution. Asmagh ships in new polypropylene bags of 25 or 50 kg.

Container load about 19 MT per 20 ft container.

9 Sampling

Representative samples are drawn from each consignment strictly by the method in the Sudanese standard for sampling of oilseeds (SDS 200).

10 Labelling

Every package carries a clear label that cannot be destroyed or removed, properly fixed, showing:

Name of the crop	Type of the crop	Code number	Country of origin
 Sesame seeds	 White, mixed or red	 Lot code	 Sudan
Season of production	Net weight (kg)	Exporting company	Trade mark
 Crop year	 25 or 50 kg	 Asmagh Sudanese Exports	 Asmagh

11 Testing

Each shipment carries an analysis and quality certificate issued by the Sudanese Standards & Metrology Organization (SSMO).

12 Inspection

Buyers may appoint an international inspection company to sample and check quality and quantity at loading.

From field to port

من الحقل إلى الميناء

Every lot is sampled on arrival, cleaned, sorted by colour and tested before it is packed. Storage and loading are checked too, because quality can be lost after processing.

1 Our quality process

1

Sourcing

Bought from trusted growers and traders in Gedaref, Sennar and Kordofan; every incoming lot is checked.

2

Cleaning

Machine-cleaned to remove dust and foreign matter.

3

Sorting by colour

Sorted into white, mixed or red sesame by the share of coloured seeds.

4

Hulling

Hulled when the buyer orders hulled sesame.

5

Testing

Samples tested for moisture, impurities and the parameters in the buyer's specification.

6

Packing

Packed in new 25 or 50 kg bags marked with crop, type, lot and weight.

7

Storage

Kept dry and ventilated, out of the sun and away from contamination until loading.

8

Loading and shipping

Containers inspected and loading supervised; shipped from Port Sudan with full documents.

2 Origin and shipping

Sudan is one of the world's leading sesame exporters. Sesame is grown mainly on the rain-fed plains of Gedaref, Sennar and Kordofan, and travels to Port Sudan on the Red Sea for export.

HS code	120740 (indicative; confirm with your customs broker)
Port of loading	Port Sudan (SDPZU), Red Sea
Container load	About 19 MT per 20 ft container
Ready to load	Usually 10–15 days after contract
Transit	About 2–8 weeks, by destination
Delivery terms	FOB Port Sudan, CFR or CIF
Payment terms	Irrevocable L/C at sight, TT advance, or D/P
Samples	Free; courier paid by the buyer

3 Export documents

Certificates travel with each shipment and are exchanged through the banks or directly with the buyer, so the goods clear customs at destination.

Product certificates

Certificate of origin
Sudan Chamber of Commerce; general or preferential forms.

Phytosanitary certificate
Official inspection against the importing country's pest list.

Analysis and quality certificate
Issued by the Sudanese Standards & Metrology Organization (SSMO).

Fumigation certificate
Treatment, chemical, dose and temperature used.

Inspection certificate
Optional; by an international inspection company chosen by the buyer.

Shipping documents

Export contract
Attested by the Ministry of Trade and the Chamber of Commerce.

Commercial invoice
Goods, quantity, value and terms.

Packing list
Every bag in each container, with counts and weights.

Bill of lading
Issued by the shipping line on loading.
