

Sudanese Sorghum grains

الذرة الرفيعة (البيضاء)

Sorghum bicolor

Whole or decorticated

Sorghum bicolor
Botanical source

Clean, machine-cleaned
Grade

1007.90
HS code (indicative)

1 Scope

This sheet specifies sorghum grains for human consumption, exported by Asmagh Sudanese Exports from Port Sudan. It does not apply to products made from sorghum grains.

2 Synonyms

Sorghum

Dura (ذرة)

Great millet

Sorghum bicolor (L.) Moench

3 Definitions

Sorghum grains
Whole or decorticated grains of *Sorghum bicolor* (L.) Moench.

Whole grains
Grains as obtained after complete threshing, with no further treatment.

Decorticated grains
Grains from which the outer layers and all or part of the germ have been removed mechanically, removing at most 20 % of the grain.

4 Description

Sorghum is the most widely grown cereal in Sudan: drought-tolerant, nutritious, and grown for flour, traditional foods and animal feed. Grain colour varies with the variety, from white and cream to red and brown.

5 Grade and forms

Clean	Machine-cleaned whole grains
Available as	Whole grains Decorticated Flour

6 Uses

Flour and traditional foods

Livestock and poultry feed

Brewing

7 Requirements

7.1 General requirements

- ✓ Characteristic taste and odour, free from abnormal odour and taste

✓ Clean, free from insect infestation and visible mould

✓ Whole grains are not genetically modified
- ✓ Free from insects and their fragments, rodents and their remains, and bird droppings

✓ Safe, with no toxic seeds or anything hazardous to health

7.2 Technical requirements

Requirement	Whole grains	Decorticated grains	Method
Moisture, max	12.5 %	12.0 %	SDS 487:2010
Ash, max	2.1 %	1.5 %	SDS 1015:2014
Protein, min	8 %	7.0 %	SDS 1016:2016
Fat, max	5 %	2 %	SDS 4778:2016
Tannin, max	0.5 %	0.3 %	SDS 4443:2009
Fat acidity, max (mg KOH/100 g)	50	40	SDS 1163:2010
Broken kernels, max	2 %	5 %	Sieve, 1-1.75 mm
Other (foreign) grains, max	3 %	1.0 %	Visual separation

Percent by mass, calculated on dry matter. Broken kernels pass through a sieve of 1-1.75 mm aperture and are weighed as a percentage of a 100 g sample; other grains are separated by eye and weighed the same way.

7.3 Codex Standard for Sorghum Grains (CXS 172-1989), for reference

Moisture	≤ 14.5 %
Extraneous matter	≤ 2.0 %, of which inorganic ≤ 0.5 %
Filth (animal impurities, dead insects)	≤ 0.1 %
Total defects	≤ 8.0 %
Tannin, dry basis	≤ 0.5 % whole; ≤ 0.3 % decorticated
Protein (N × 6.25), dry basis	≥ 7.0 %
Fat, dry basis	≤ 4.0 %
Toxic seeds	Free from <i>Crotalaria</i> , corn cockle, castor bean and jimson weed

Our moisture limits are stricter than Codex. Our fat limit for whole grains (5 %) is higher than the Codex limit of 4.0 %.

7.4 Contaminants

Heavy metals and mycotoxins	Within Sudanese Standard SDS 2842-1:2014 (grain contaminants, part 1)
Pesticide residues	Within Sudanese Standard SDS 2842-2:2015 (grain contaminants, part 2)
Microbiology	Within Sudanese Standard SDS 4139-1:2014 (microbiological limits in food)
Radioactivity	≤ 10 Bq/kg

8 Packaging

Packed in sound, clean, new containers that do not contaminate the grain, meeting Sudanese Standard SDS 2390 (plastic sacks for foodstuffs). Asmagh ships in polypropylene bags of 50 kg.

Container load about 22 MT per 20 ft container.

9 Storage

Stored in clean, well-ventilated premises never used before for materials hazardous to health, which protect the grain from insects, rodents, other pests and moisture and keep its physical, chemical and technological properties, in line with SDS 3891 (food stores).

10 Labelling

In addition to Sudanese Standard SDS 2889:2015 (labelling of packaged food), the packages and shipping documents show the following. For bulk shipments, the information is given in the shipping documents only.

Product name  Sorghum grains, whole or decorticated	Producer and trade mark  Asmagh Sudanese Exports	Production and expiry date  Month and year	Country of origin  Sudan
Net weight  In kg or units	Lot identification  On every bag	Bulk shipments  Details in the shipping documents	

11 Transport

- Transported in a way that protects the grain from weather changes, insects, rodents, contamination and mechanical damage.
- Vehicles and containers are clean and have not been used to carry pesticides, herbicides, or toxic or pungent substances.

12 Shelf life

Two years from the date of harvest.

13 Sampling and testing

Samples are taken according to Sudanese Standard SDS 1005:2014 (sampling of grains) and tested by the methods in section 7.2.

Each shipment carries an SSMO analysis and quality certificate.

From field to port

من الحقل إلى الميناء

Every lot is sampled on arrival, machine-cleaned, sorted and tested before it is packed. Storage and loading are checked too, because quality can be lost after processing.

1 Our quality process

1

Sourcing

Bought from growers and traders across Sudan's sorghum belt; every incoming lot is checked.

2

Cleaning

Machine-cleaned to remove dust, chaff, stones and foreign matter.

3

Sorting

Broken kernels, other grains and damaged grains removed.

4

Decorticating and milling

Decorticated or milled into flour when the buyer orders it.

5

Testing

Samples tested for moisture, tannin, broken kernels and other grains.

6

Packing

Packed in new 50 kg polypropylene bags marked with product, lot and weight.

7

Storage

Kept clean, dry and ventilated, protected from insects and rodents.

8

Loading and shipping

Containers inspected and loading supervised; shipped from Port Sudan with full documents.

2 Origin and shipping

Sorghum is the most widely grown cereal in Sudan. The cleaned grain travels to Port Sudan on the Red Sea for export.

HS code	1007.90 (indicative; confirm with your customs broker)
Port of loading	Port Sudan (SDPZU), Red Sea
Container load	About 22 MT per 20 ft container
Ready to load	Usually 10–15 days after contract
Transit	About 2–8 weeks, by destination
Delivery terms	FOB Port Sudan, CFR or CIF
Payment terms	Irrevocable L/C at sight, TT advance, or D/P
Samples	Free; courier paid by the buyer

3 Export documents

Certificates travel with each shipment and are exchanged through the banks or directly with the buyer, so the goods clear customs at destination.

Product certificates

Certificate of origin
Sudan Chamber of Commerce; general or preferential forms.

Phytosanitary certificate
Official inspection against the importing country's pest list.

Analysis and quality certificate
Issued by the Sudanese Standards & Metrology Organization (SSMO).

Fumigation certificate
Treatment, chemical, dose and temperature used.

Inspection certificate
Optional; by an international inspection company chosen by the buyer.

Shipping documents

Export contract
Attested by the Ministry of Trade and the Chamber of Commerce.

Commercial invoice
Goods, quantity, value and terms.

Packing list
Every bag in each container, with counts and weights.

Bill of lading
Issued by the shipping line on loading.
